

TROOP TRANSPORTS

LEJEUNE-CLASS

Active Service: 2275-present

Ship's Dimensions:

Length: 520.5m
Width: 185.3m
Height: 71.0m

Ship's Complement:

Officers: 72; Crew: 570

Weaponry:

Phasers: 9 Banks of 2 Cannons
Photon Torpedoes: 8 Tubes

LeJeune-class starships were first introduced in 2275 following the destruction of Starbase 27. This class vessel has served Starfleet in transporting and deploying Starfleet Marines throughout Federation space. The type of ship can transport up to 10,000 Starfleet Marines under emergency conditions, but usually provides transportation for 4,000 or less as needed.

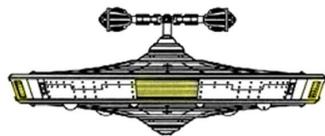

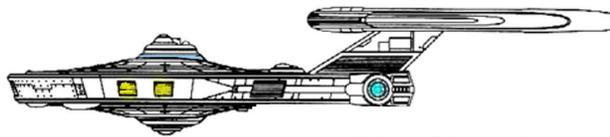

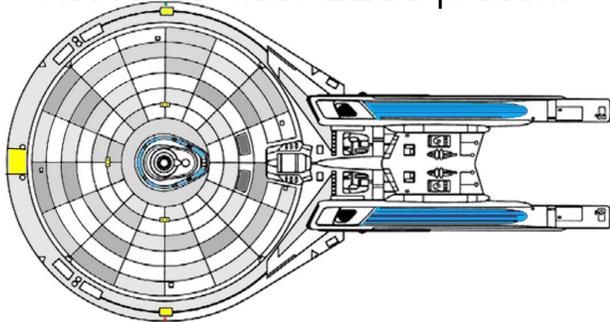

SHIPS OF THE CLASS:

- NCC-2300 U.S.S. *LeJeune*
- NCC-2301 U.S.S. *Puller*
- NCC-2302 U.S.S. *Daly*
- NCC-2303 U.S.S. *Basilone*

- NCC-2309 U.S.S. *Zeilin*
- NCC-2310 U.S.S. *McCawley*

SURVEY CRUISERS

OBERON-CLASS

Active Service: 2283-present

Ship's Dimensions:

Length: 310.0m
Width: 175.0m
Height: 74.0m

Ship's Complement:

Officers: 22; Crew: 310

Weaponry:

Phasers: 6 Banks of 2 Cannons
Photon Torpedoes: 4 Tubes

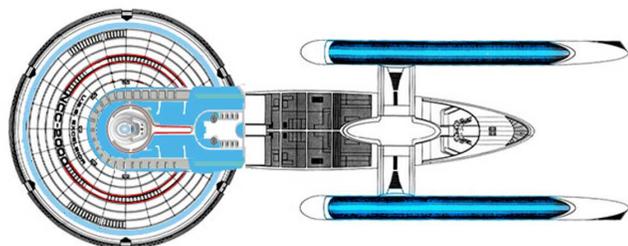

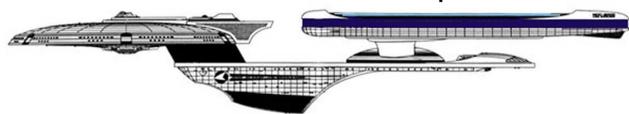

Oberon-class starships were first introduced in 2283. This vessel has served Starfleet in the long-range exploration of distant star systems, interstellar phenomena and surveying class M planets detected by long-range sensor probes.

SHIPS OF THE CLASS:

- NCC-2400 U.S.S. *Oberon*
- NCC-2401 U.S.S. *Titania*
- NCC-2402 U.S.S. *Lysander*
- NCC-2403 U.S.S. *Hermia*

DEEP SPACE EXPLORERS

EXCELSIOR-CLASS Active Service: 2284-present

Ship's Dimensions:

Length: 467.0m

Width: 177.2m

Height: 78.9m

Ship's Complement:

Officers: 65; Crew: 545

Weaponry:

Phasers: 12 Banks of 2 Cannons

Photon Torpedoes: 4 Tubes

Excelsior-class starships were first introduced in 2284 as "The Great Experiment," meaning that the vessel was to have been equipped with transwarp drive. While the drive simply didn't deliver the velocities hoped for, it was an improvement over the speed records of the *Constitution*-class, and the stability of the design, the long-range capability of the starship, and the extreme maneuverability (despite the seemingly gangly design), resulted in this starship class (and its *Enterprise* variant) replacing the aging *Constitution*-class fleet.

DEEP SPACE EXPLORERS

ENTERPRISE-VARIANT

Active Service: 2294-present

Ship's Dimensions:

Length: 470.7m
 Width: 177.2m
 Height: 78.9m

Ship's Complement:

Officers: 65; Crew: 545

Weaponry:

Phasers: 10 Banks of 2 Cannons
 Photon Torpedoes: 8 Tubes

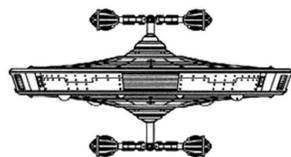

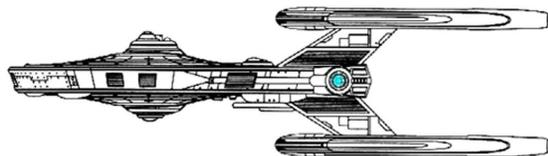

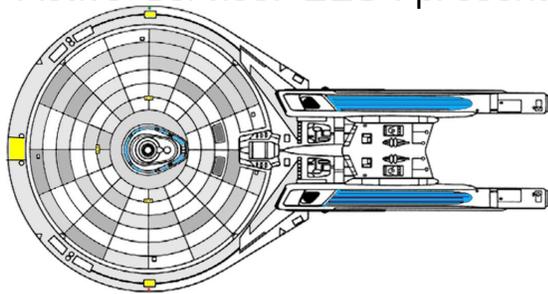

Enterprise-variant starships, based on the successful *Excelsior-class*, were first introduced in 2294. They are deep space explorers in that they can operate for many years without resupply or repair at a starbase. Many of these ships were involved in the exploration of the galactic rim and the Beta quadrant.

CONSTELLATION-CLASS

Active Service: 2284-present

Ship's Dimensions:

Length: 310.0m
 Width: 175.0m
 Height: 86.0m

Ship's Complement:

Officers: 42; Crew: 370

Weaponry:

Phasers: 6 Banks of 2 Cannons
 Photon Torpedoes: 4 Tubes
 Optional Megaphaser Turrets: 2

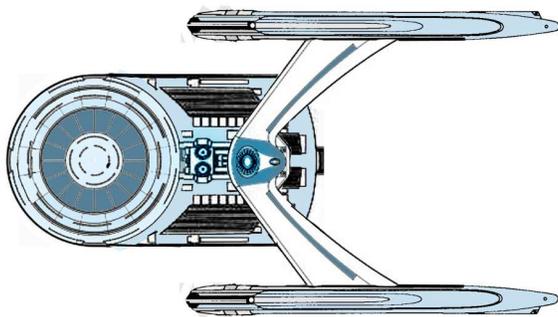

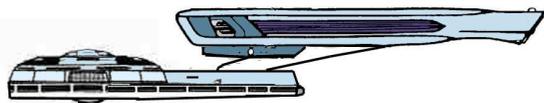

The *Constellation-class* were so successful that Starfleet issued construction contracts for additional orders of these vessels in 2288, 2290 and 2292.

PERIMETER ACTION VESSELS

GOBLIN-CLASS

Ship's Dimensions:

Length: 140.0m

Width: 73.4m

Height: 27.6m

Ship's Complement:

Officers: 6; Crew: 26

Weaponry:

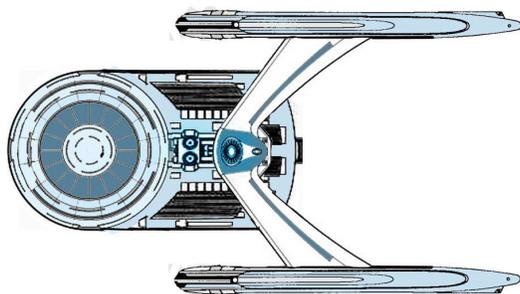

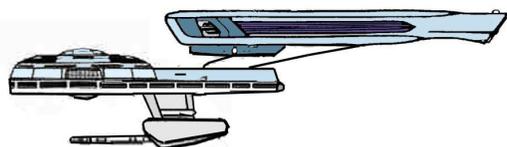

Phasers: 1 Banks of 2 Cannons

Goblin-class perimeter ships were first introduced in 2278. This vessel has served Starfleet as providing security and police action for outlying Federation systems. Some ships of this class were equipped with a megaphaser canon following the Kelvan War. The ships were christened with names of goblins from Terran literature.

SHIPS OF THE CLASS:

GOBLIN II-CLASS

Ship's Dimensions:

Length: 140.0m

Width: 73.4m

Height: 27.6m

Ship's Complement:

Officers: 6; Crew: 26

Weaponry:

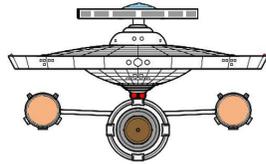

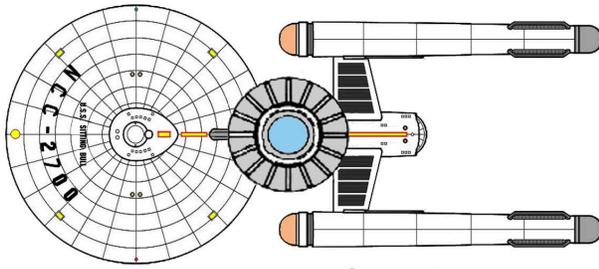

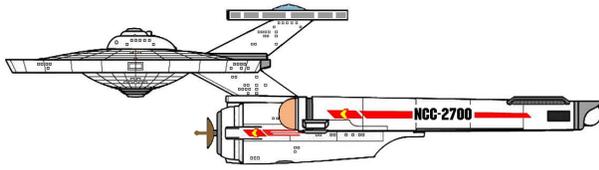

Phasers: 1 Banks of 2 Cannons

Megaphaser: 1 Turret of 3 Cannons

TACTICAL CRUISERS

SITTING BULL-CLASS

Active Service: 2263-2284

Ship's Dimensions:

Length: 312.6m
 Width: 127.1m
 Height: 52.3m

Ship's Complement:

Officers: 42; Crew: 370

Weaponry:

Phasers: 4 Banks of 2 Cannons
 Photon Torpedoes: 2 Tubes

Sitting Bull-class starships were first introduced in 2263. This vessel has served Starfleet in providing fleet tracking information during wartime operations.

The large dish-shaped platform atop the rear of the primary hull is capable of long range detection of ship movements, both friendly and otherwise.

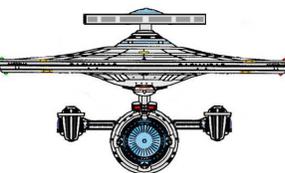

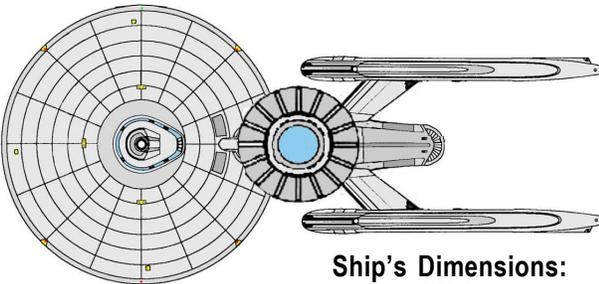

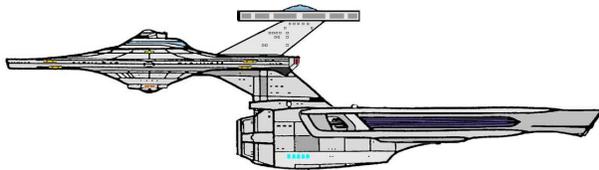

SHIPS OF THE CLASS:

- NCC-2700 U.S.S. *Sitting Bull*
- NCC-2701 U.S.S. *Black Elk*
- NCC-2702 U.S.S. *Washakie*
- NCC-2703 U.S.S. *Tall Bull*
- NCC-2704 U.S.S. *Red Cloud*
- NCC-2705 U.S.S. *Black Sparrow Hawk*
- NCC-2706 U.S.S. *Chief Joseph*
- NCC-2707 U.S.S. *Red Cloud*
- NCC-2708 U.S.S. *Geronimo*
- NCC-2709 U.S.S. *Michiquiniek*
- NCC-2710 U.S.S. *Spotted Elk*

The surviving ships of this class were refitted following the Whalesong Crisis in 2284.

SITTING BULL II-CLASS

Active Service: 2284-present

Ship's Dimensions:

Length: 322.9m
 Width: 147.5m
 Height: 52.3m

Ship's Complement:

Officers: 48; Crew: 392

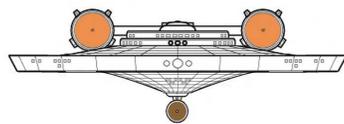

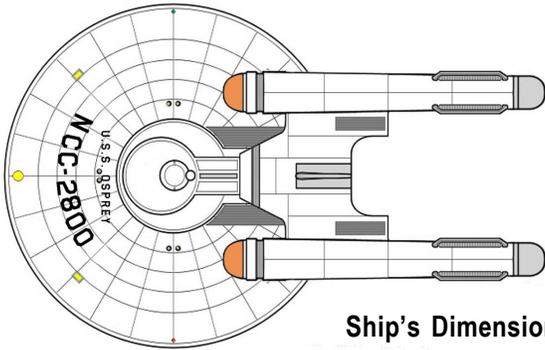

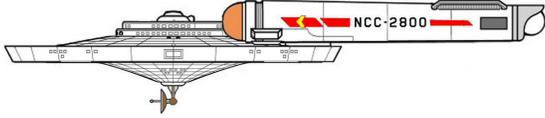

Weaponry:

Phasers: 7 Banks of 2 Cannons
 Photon Torpedoes: 2 Tubes

MINESWEEPERS

OSPREY-CLASS

Active Service: 2244-2274

Ship's Dimensions:

Length: 212.6m

Width: 105.0m

Height: 47.9m

Ship's Complement:

Officers: 32; Crew: 124

Weaponry:

Phasers: 6 Banks of 2 Cannons

Osprey-class starships were first introduced in 2244 following the Battle of Donatu V in order to clear all spacelanes of mines left by both sides during this conflict. This vessel has also served Starfleet in maintaining the Federation's navigation, hazard and prohibition buoys during times of peace.

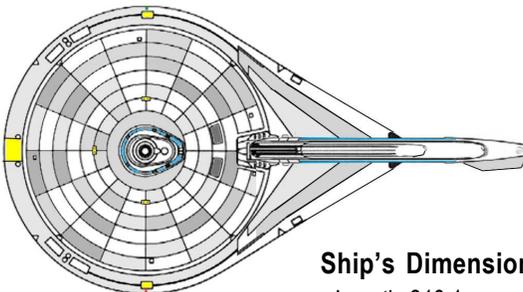

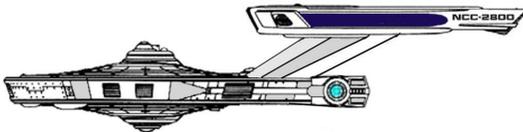

SHIPS OF THE CLASS:

NCC-2800	U.S.S. <i>Osprey</i>
NCC-2801	U.S.S. <i>Goshawk</i>
NCC-2802	U.S.S. <i>Bateleur</i>
NCC-2803	U.S.S. <i>Xirannah</i>
NCC-2804	U.S.S. <i>Pearl Kite</i>
NCC-2805	U.S.S. <i>Sparrowhawk</i>
NCC-2806	U.S.S. <i>Caracara</i>
NCC-2807	U.S.S. <i>Vulture</i>
NCC-2808	U.S.S. <i>Eel Bird</i>
NCC-2809	U.S.S. <i>Harrier</i>
NCC-2810	U.S.S. <i>Nicobar</i>

FIGHTER ESCORTS

ARCHANGEL-CLASS

Active Service: 2277-present

Ship's Dimensions:

Length: 310.1m

Width: 175.0m

Height: 62.4m

Ship's Complement:

Officers: 42; Crew: 454

Weaponry:

Phasers: 6 Banks of 2 Cannons

Archangel-class starships were first introduced in 2277. This vessel has served Starfleet in providing escort to fighter groups. Following the Kelvan War, these vessels were sent into occupied systems with enough forces to liberate them, and provided escort to those fighters and landing craft so assigned.

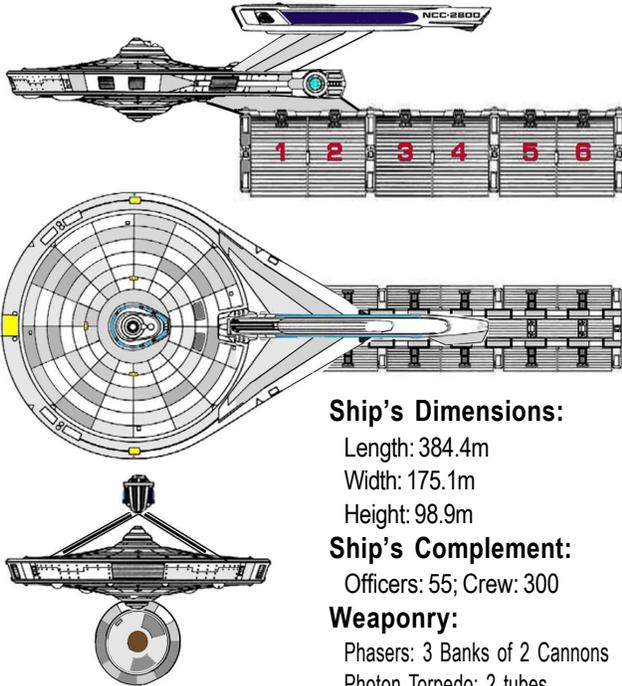

SHIPS OF THE CLASS:

NCC-2900	U.S.S. <i>Archangel</i>
NCC-2901	U.S.S. <i>Michael</i>
NCC-2902	U.S.S. <i>Gabriel</i>
NCC-2903	U.S.S. <i>Raphael</i>
NCC-2904	U.S.S. <i>Uriel</i>
NCC-2905	U.S.S. <i>Metatron</i>
NCC-2906	U.S.S. <i>Remiel</i>
NCC-2907	U.S.S. <i>Sariel</i>

NCC-2909	U.S.S. <i>Anael</i>
NCC-2910	U.S.S. <i>Raziel</i>

FLEET TENDERS

ALBANY-CLASS

Active Service: 2283-present

Ship's Dimensions:

Length: 384.4m
 Width: 175.1m
 Height: 98.9m

Ship's Complement:

Officers: 55; Crew: 300

Weaponry:

Phasers: 3 Banks of 2 Cannons
 Photon Torpedo: 2 tubes

Albany-class starships were first introduced in 2283. This class of vessel was responsible for much of the distribution of war material to various starbases, deep space stations and repair bases during the Kelvan War in 2285. Following the war, they were used to establish extensive logistics bases throughout the Alpha Quadrant.

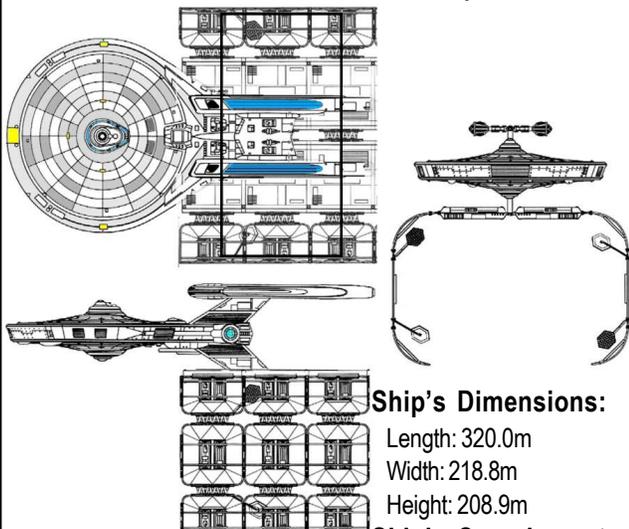

SHIPS OF THE CLASS:

- NCC-3000 U.S.S. *Albany*
- NCC-3001 U.S.S. *Barstow*
- NCC-3002 U.S.S. *Brindisi*
- NCC-3003 U.S.S. *Williams*
- NCC-3004 U.S.S. *Cat Lo*
- NCC-3005 U.S.S. *Lagos*
- NCC-3006 U.S.S. *Châteauroux-Déols*
- NCC-3007 U.S.S. *Curragh*
- NCC-3008 U.S.S. *Yuzhu*

REPAIR TENDERS

SAN DIEGO-CLASS

Active Service: 2283-present

Ship's Dimensions:

Length: 320.0m
 Width: 218.8m
 Height: 208.9m

Ship's Complement:

Officers: 55; Crew: 300

Weaponry:

Phasers: 3 Banks of 2 Cannons
 Photon Torpedo: 2 tubes

San Diego-class starships were first introduced in 2283. During the Kelvan War, this class of vessel was responsible for most of the repairs to starships which allowed them to continue their operations following a major battle. Following the war, they were used to repair most of the crippled starships in Starfleet as well as perform salvage operations in various battlefields.

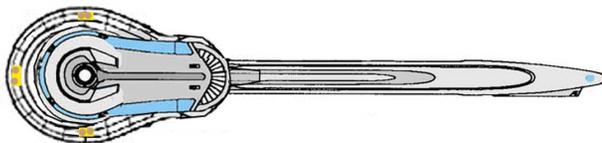

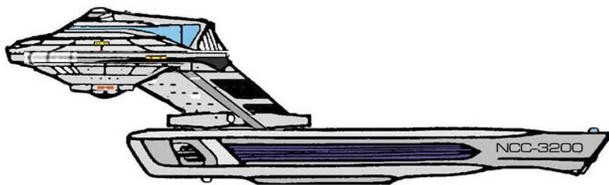

SHIPS OF THE CLASS:

- NCC-3100 U.S.S. *San Diego*
- NCC-3101 U.S.S. *Prarie*
- NCC-3102 U.S.S. *Long Beach*
- NCC-3103 U.S.S. *San Pedro*
- NCC-3104 U.S.S. *Maumee*
- NCC-3105 U.S.S. *Kitakami*

CORSAIRS

LE-MATYA-CLASS

Active Service: 2282-present

Ship's Dimensions:

Length: 173.0m

Width: 35.1m

Height: 69.2m

Ship's Complement:

Officers: 22; Crew: 98

Weaponry:

Phasers: 4 Banks of 2 Cannons

Photon Torpedo: 4 tubes

Le-Matya-class starships were first introduced in 2282, although none were commissioned until 2286. This vessel was instrumental in restoring the Federation colonies to their pre-war security following the Kelvan War. They were intended to be used as gunships throughout the borders, and yet were responsible for helping restore Federation security throughout the quadrant.

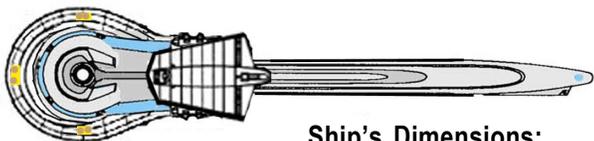

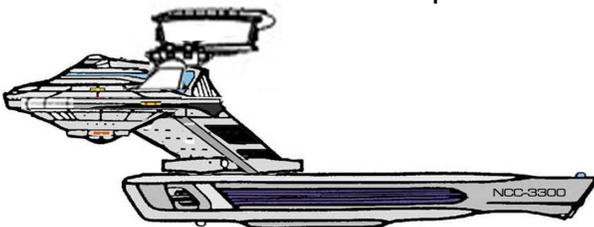

SHIPS OF THE CLASS:

NCC-3200	U.S.S. <i>Le-matya</i>
NCC-3201	U.S.S. <i>Grizzly</i>
NCC-3202	U.S.S. <i>Kodiak</i>

CORVETTES

MUGATO-CLASS

Active Service: 2282-present

Ship's Dimensions:

Length: 173.0m

Width: 35.1m

Height: 74.0m

Ship's Complement:

Officers: 22; Crew: 98

Weaponry:

Phasers: 8 Banks of 2 Cannons

Photon Torpedo: 10 tubes

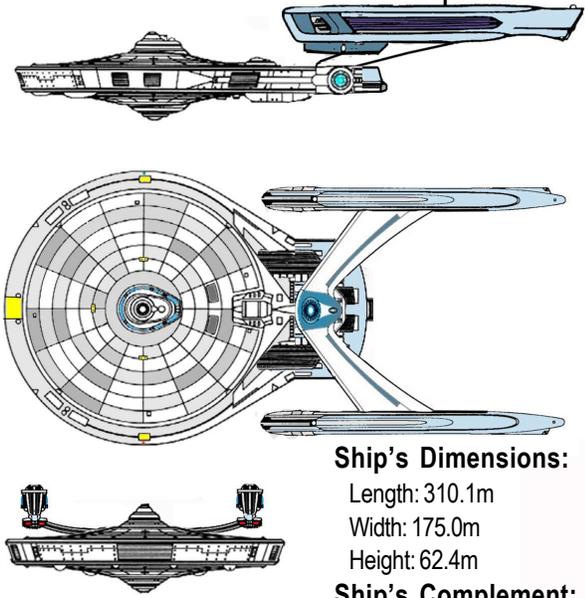

Mugato-class starships were first introduced in 2282, although none were commissioned until 2285. This vessel was instrumental in the Federation victory during the Kelvan War. They were intended to be used as photon torpedo ships throughout the borders, and yet were partially responsible for the victory of Federation forces.

SHIPS OF THE CLASS:

NCC-3300	U.S.S. <i>Mugato</i>
NCC-3301	U.S.S. <i>Fer d'Lance</i>
NCC-3302	U.S.S. <i>Diamondback</i>

SEA WITCH-CLASS
 Active Service: 2282-present

Ship's Dimensions:
 Length: 310.1m
 Width: 175.0m
 Height: 62.4m

Ship's Complement:
 Officers: 51; Crew: 484

Weaponry:
 Phasers: 6 Banks of 2 Cannons

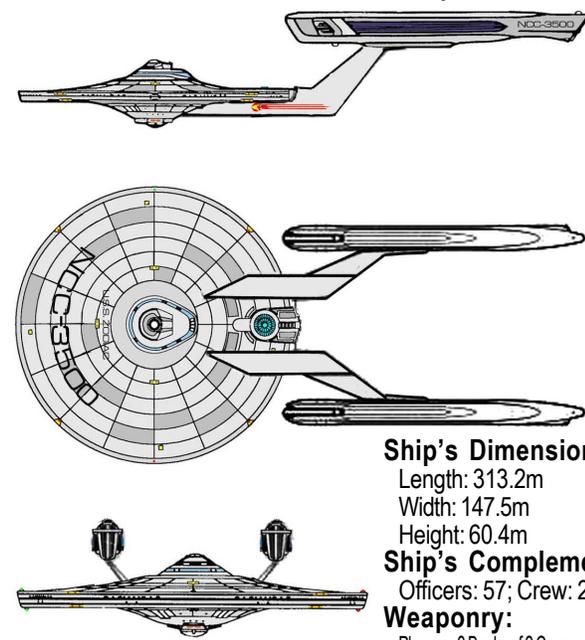

Sea Witch-class starships were first introduced in 2282. This vessel has served Starfleet in piracy interdiction, border patrol, and long-range exploration. During times of war, they are also capable of being used as mine sweepers and mine tenders.

SHIPS OF THE CLASS:

- NCC-3400 U.S.S. *Sea Witch*
- NCC-3401 U.S.S. *Amsterdam*
- NCC-3402 U.S.S. *Sovereign*

SCHOONERS

ZODIAC-CLASS
 Active Service: 2283-present

Ship's Dimensions:
 Length: 313.2m
 Width: 147.5m
 Height: 60.4m

Ship's Complement:
 Officers: 57; Crew: 247

Weaponry:
 Phasers: 3 Banks of 2 Cannons
 Photon Torpedoes: 2 tubes

Zodiac-class starships were first introduced in 2283. This type of vessel has served Starfleet in maintaining the Federation's borders, while examining navigation hazards and scientific phenomena.

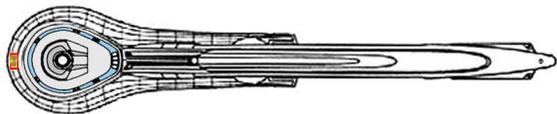

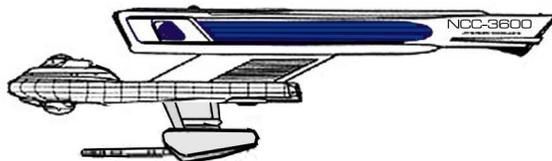

SHIPS OF THE CLASS:

CUTTERS

ANGLER-CLASS

Active Service: 2275-present

Ship's Dimensions:

Length: 202.6m

Width: 40.4m

Height: 53.6m

Ship's Complement:

Officers: 6; Crew: 26

Weaponry:

Phasers: 1 Banks of 2 Cannons

MegaPhaser: 1 Turret of 3 Cannons

Angler-class starships were first introduced in 2275. These small vessels are designed for system police patrol duty and pirate interdiction. They are heavily armed, featuring a megaphaser turret, but woefully inadequate to serve as warships. Still, some cutters were pressed into service during the Kelvan War in 2285, and performed admirably.

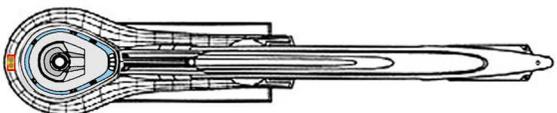

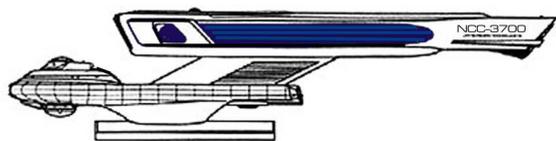

SHIPS OF THE CLASS:

LIGHT TRANSPORTS

PIGGY BACK-CLASS

Active Service: 2278-present

Ship's Dimensions:

Length: 202.6m

Width: 40.4m

Height: 48.8m

Ship's Complement:

Officers: 2; Crew: 18

Weaponry:

Phasers: 1 Banks of 2 Cannons

Piggyback-class starships were first introduced in 2278. This vessel has served Starfleet in transporting containers within Federation space, especially when transport-tugs are unavailable due to the demands of long-range commitments. They have limited range and weaponry, but are more than capable of transporting containers from one Federation planet to another.

SHIPS OF THE CLASS:
